

SAMUEL T. MBOGO

Investment Analyst: Project Finance, Blended Finance & Infrastructure Debt

Nairobi, Kenya · officialsammbogo@gmail.com · +254 701 735 388 · [linkedin.com/in/samuel-mbogo](https://www.linkedin.com/in/samuel-mbogo) · [samueltmbogo.github.io](https://github.com/samueltmbogo)

PROFESSIONAL SUMMARY

Investment professional working toward a career in alternative assets portfolio management, currently building that foundation through blended finance infrastructure investing as an Investment Analyst at KIFFWA, where origination, financial modelling and portfolio oversight sit alongside a growing network of DFI, donor and government partnerships. Prior advisory experience at RSM Eastern Africa built the technical grounding for that path: project finance modelling, debt capital structuring, valuation and restructuring work engaging directly with lenders, sponsors and investment committees through to close. Increasingly drawn to public-sector and sovereign-facing transaction work, where credit solutions for governments, sub-sovereigns and public utilities sit closest to the principal investing and portfolio management mandate this path is building toward.

IMPACT & TRANSACTION SCORECARD

Aggregate figures drawn from named engagements below. Each one is traceable to a specific deal, not a running total of estimates.

Capital Raised & Structured	USD 6M DFI equity raise supported to close within a USD 12M capital programme (Project Stationer); USD 150M project finance structure advanced to lender and investor due diligence (Project Cure)
Valuation Coverage	USD 250M+ across agriculture, education and manufacturing (Project Portfolio)
Restructuring & Distressed Credit	~USD 40M restructured secured debt; post-restructuring lender oversight (Project Aluminium Revival)
Geographic Reach	7 countries: Kenya, Uganda, Tanzania, Rwanda, Zambia and Mauritius (Project Stationer); Indonesia (cross-border client mandate)
DFI & Donor Relationships	6 active engagements: a multilateral-hosted water project-preparation facility, a UN agency, a private East African development foundation, an international humanitarian NGO, a European water-sector entrepreneurship programme and a European climate and development consultancy
Sectors Covered	9: water & sanitation, pharmaceutical manufacturing, renewable energy, real estate, agribusiness, metals & industrial, fintech, education, NGO/development

CORE COMPETENCIES

Project Finance & Infrastructure. Financial feasibility studies, debt sizing and coverage-ratio analysis (DSCR, LLCR, PLCR), cash-flow waterfall and drawdown structuring, capital structure advisory for large-scale infrastructure and industrial assets.

Debt Capital Structuring & Blended Finance. Structuring concessional, commercial and blended debt transactions for infrastructure and agribusiness clients; first-loss, guarantee and layered capital structures aligned with DFI investment mandates.

Financial Modelling & Analysis. Three-statement and project finance models, scenario and sensitivity analysis, DCF valuations, NAV and comparable multiples, spanning USD 12 million capital programmes to USD 150 million industrial parks.

Deal Advisory & Transaction Support. End-to-end transaction support: teasers, information memoranda, investor targeting, negotiation support and investment committee preparation across debt, equity and blended-finance structures.

Asset Management & Portfolio Oversight. Portfolio monitoring, investment appraisal and MEL for infrastructure assets; patient-capital return metrics (MOIC vs. IRR), pipeline management and capital-deployment alignment with fund-level objectives.

Valuation. Business and asset valuation using NAV, comparable multiples and DCF across agriculture, education, manufacturing, food, health and pharmaceutical industries; deals valued at over USD 250 million cumulatively.

Forensic Investigation & Restructuring. Asset tracing, balance-sheet reconstruction and compliance review for companies under administration; Statement of Affairs preparation and creditor-resolution support.

TECHNICAL SKILLS & TOOLS

Financial Modelling: Microsoft Excel (advanced): Scenario Manager, Solver, Data Tables, Goal Seek, Power Query, Power Pivot, array formulas, INDEX-MATCH/XLOOKUP, XNPV/XIRR/PMT/RATE; project finance, 3-statement, DCF and LBO model construction; Monte Carlo simulation via VBA and @RISK/Crystal Ball.

Data & Programming: Python (pandas, NumPy, scikit-learn, matplotlib, statsmodels, openpyxl); Power BI, Tableau; Excel VBA macros for report generation and model automation.

Systems & Delivery: Sage X3 Evolution, Xero, QuickBooks; Microsoft PowerPoint and Canva for investment committee and investor-facing materials; Notion, Slack, Microsoft Teams.

Research & Data Sources: Aswath Damodaran datasets, FRED, World Bank Open Data, IMF WEO, AfDB Open Data, KNBS, Central Bank of Kenya, SEC EDGAR, OpenBB Terminal.

AI-Augmented Workflows: Claude Cowork for end-to-end research, financial modelling support and multi-step document workflows across analytical tasks.

PROFESSIONAL EXPERIENCE

Investment Analyst | Kenya Innovative Finance Facility for Water (KIFFWA)

October 2025 – Present · Nairobi, Kenya

KIFFWA is a blended finance facility, funded primarily by the Embassy of the Kingdom of the Netherlands (EKN), that lends recoverable, below-market development capital to early-stage Kenyan water and sanitation projects, funding feasibility, technical, legal and transaction work through to financial close; commitments are capped at 50% of a project's development budget and EUR 500,000, and capital is recycled on repayment or exit.

Duties & Responsibilities

- Manage KIFFWA's investment pipeline of 38 active initiatives across 17 counties, from community water schemes to national bulk-water and dam PPPs, running Quick Scan screening against mandate, bankability and instrument criteria; a further 33 initiatives have been screened out and closed.
- Contribute to monitoring, covenant tracking, impact data collection, reporting and Investment Committee preparation across an active portfolio of eight development-stage investments, with about EUR 2 million committed against about EUR 76 million of underlying project value.
- Prepare programme and MEL reporting to the anchor funder against the Dutch Ministry of Foreign Affairs' Inclusive Green Growth results framework, tracking SDG 6 outcomes including people reached with water and sanitation, jobs created and non-revenue water reduction.

Key Achievements

- Supported the setup of a PPP framework partnership with the national government ministry responsible for water, through which 14 national bulk-water, dam and desalination projects have entered KIFFWA's pipeline for project-preparation support.
- Conducted an independent credit cross-check of a prospective water utility investment against three years of sector-regulator performance data, identifying a sustained fall in O&M cost coverage and a creditworthiness-index downgrade absent from the utility's base case; recommended a hold pending clarification items which, once resolved, advanced the project to a draft letter of no objection and Investment Committee due diligence.
- Led the exit valuation and exit structuring analysis for a legacy minority equity stake in a hydropower SPV: phased valuation in Investment Committee, buyer and management versions; transfer versus buy-back, stamp duty and capital gains tax; sequencing ahead of a PPA-triggered lock-in; and the Investment Committee presentation.
- Rebuilt the financial model behind KIFFWA's 2027–2031 strategic plan to FAST standard, surfacing cash-flow constraints the prior model obscured, and translated a DFI's fund-level due diligence feedback into capital-structure options for the next phase (GP/LP fund versus layered facility or SMA); output presented to the anchor funder.

Corporate Finance Semi Senior | RSM (Eastern Africa) Consulting Ltd

November 2023 – April 2025 · Nairobi, Kenya

Advisory practice spanning financial modelling, valuation, deal advisory, restructuring and forensic investigation across multiple industries and geographies; USD 400m+ in cumulative mandate value.

Duties & Responsibilities

- Conducted deep-dive analysis of historical financial statements for parent companies and subsidiaries underpinning capital-raising, valuation and advisory mandates.
- Built and consolidated financial models (three-statement, project finance, valuation) for manufacturing, real estate, healthcare, education and agribusiness clients across six countries.
- Prepared investment committee materials, due diligence reports and stress-tested scenarios for lenders, investors and internal review.

Key Achievements

Project Cure: Pharmaceutical Industrial Park, USD 150 million (Project Finance Analyst)

Owned the end-to-end financial model for a 10-year, USD 150 million integrated industrial park (pharmaceutical manufacturing, diagnostics, contract manufacturing and shared logistics) across 12 distinct asset classes, built to anchor simultaneous conversations with commercial banks, DFIs and equity partners.

- Architected the model across all 12 asset classes, each with distinct revenue drivers, cost structures and phasing, and calculated lender-facing coverage ratios (DSCR, LLCR, PLCR) alongside investment metrics (IRR, NPV, Money Multiple).
- Sized debt capacity against a minimum 1.30x DSCR and 1.40x LLCR, within a capital structure of 30% equity / 70% debt drawn over a 3-year construction period in tranches tied to certified EPC milestones, against a 12-year debt tenor, consistent with lender norms for comparable East African infrastructure.
- Built the cash-flow waterfall to standard project-finance priority of payments (opex, senior debt service, DSRA and MRA top-ups, tax, equity distributions), with a six-month DSRA and distribution-lock/cure-period mechanics gating equity payouts until tested ratios cleared.
- Stress-tested the model across construction cost-overflow (15% contingency), revenue-delay, regulatory-approval-delay, currency and pricing scenarios, informed by a risk workshop with the client's project team.
- Mapped project outcomes against the IFC Performance Standards and relevant SDGs (3, 8, 9) for DFI-facing reporting, and against Kenya's Pharmacy and Poisons Board GMP licensing pathway for regulatory cost and timing assumptions.
- Model anchored capital-raising conversations with commercial banks, DFIs and equity partners; project advanced to the next stage of due diligence with interested parties.

Project Stationer: Regional Manufacturing Group, USD 12 million Capital Programme (Financial Modeller)

Led financial modelling for a family-owned regional manufacturing and distribution group with operations across six countries in East and Southern Africa and the Indian Ocean, maintaining and developing the group model behind a USD 12 million capital programme of structured debt and DFI equity.

- Analysed 5 years of financial statements across the parent company and 7 subsidiaries, then reviewed, updated and developed a comprehensive multi-subsidiary model with debt-capacity metrics (DSCR, ICR, debt-to-EBITDA) and stress-tested it under revenue, cost and FX scenarios.
- Prepared the client for Investment Committee inquiries by simulating likely questions and responses, and engaged directly with financiers.
- The model supported reporting on the group's existing USD 6 million structured-debt facility and the USD 6 million DFI equity raise that closed in 2025.

Project Aluminium Revival: Industrial Manufacturer Turnaround & Restructuring, ~USD 40 million (Business Analyst)

Provided lender-appointed oversight for a Kenyan industrial manufacturer emerging from the restructuring of an approximately USD 40 million debt default, as it drew working-capital funding from a secured lender while settling obligations to creditors, banks and the tax authority.

- Compiled monthly management accounts with month-on-month performance tracking and contributed to the Statement of Affairs; recommended the liquidity and coverage ratios required to meet monthly obligations to creditors, banks and the tax authority.
- Prepared and defended quarterly reports to the secured lender, giving it assurance that its working-capital funding was used efficiently while preserving headroom for monthly finance obligations; advised management on expense treatment and operational efficiency.

Project Harvest: Buy-Side Due Diligence for a Global Impact Investor (Corporate Finance Semi Senior)

Conducted buy-side financial due diligence supporting an impact-linked convertible note investment by a global impact investment fund into an East African agribusiness serving smallholder farmers in displacement-affected communities; the investment closed.

Project Portfolio: Multi-Sector Valuation Assignments (Corporate Finance Senior)

Conducted valuations using NAV, comparable multiples and discounted cash flow methods across agriculture, education, manufacturing and food industries in Kenya, Uganda and Tanzania, for deals worth over USD 250 million cumulatively.

Additional Transaction Experience

- Project Clinic: consolidation and independent valuation of a 10-subsidary healthcare and pharmaceutical group ahead of a silent partner's equity exit.
- Project Mart: forensic investigation into a regional retail chain's insolvency; traced assets and verified about KES 2 billion as recoverable for creditors against liabilities of about KES 20 billion.
- Project Ledger: buy-side financial due diligence for a proposed acquisition of a Kenyan deposit-taking financial institution by a commercial bank; findings on revenue quality informed the decision not to proceed.
- Project Debut: accountant's report and financial due diligence for a Kenyan manufacturer's equity listing on the Nairobi Securities Exchange.
- Project Light: deal advisory for a Southeast Asian education group's proposed acquisition of a Nairobi school as part of its East Africa market entry; sourced targets, prepared investor materials and led field research.
- Project Equity: ESOP valuation modelling for two Kenyan companies' share-based compensation programmes.
- Project Analytics: data-analytics-led internal audit for a major East African manufacturer, surfacing operational inefficiency gaps.
- Project Plantation: risk assessment of a listed agricultural company, incorporating asset-concentration and controlling-shareholder considerations into the valuation view.
- Project Policy: finance and HR policy review and gap analysis for an international NGO operating in Kenya.

Finance and Business Advisory Associate | KKCO East Africa LLP

January 2023 – October 2023 • Nairobi, Kenya

Deployed full-time on an outsourced finance engagement for Integrated Payment Services Limited (Pesalink), a national payments infrastructure provider owned by the Kenya Bankers Association.

- Managed end-to-end accounts payable/receivable, monthly payroll for 50+ staff, and tax compliance (VAT, PAYE, withholding tax) within a CBK-regulated environment.
- Coordinated capex liaison with parent company KBA and supported delivery of a Tietoevry-led payments infrastructure project; introduced a card-loading automation tool ("Boya") and contributed to drafting the internal finance policy and manual.
- Prepared board materials (financial summaries and performance dashboards) for senior leadership across five departmental budget lines.

Finance Intern / Financial Analyst | Smart Farmer Financial Advisory

August 2022 – December 2022 • Nairobi, Kenya

- Built 3-statement financial models with scenario and sensitivity analysis, cash-flow projections and break-even analyses for 10+ agribusiness clients.
 - Prepared business cases and pitch decks for loan and grant applications, and researched financial partners relevant to the agribusiness sector.
-

EARLIER ROLES

Team Leader, Outgoing Global Volunteer (OGX) | AIESEC in the University of Nairobi

February 2021 – January 2022 · Extracurricular leadership

- Led a committee across recruitment, marketing and logistics for an international volunteer-exchange programme, tracking KPIs and coordinating placements with partner AIESEC chapters worldwide; also served as VP Business Development & Partnerships for an election conference and a tree-planting event.

Finance and Accounting Intern | Acorn Management Services Limited

October 2020 – December 2020 · Nairobi, Kenya

- Processed 100+ monthly invoices, billed residents and maintained property-level P&L, prepayment and accrual schedules for a student-accommodation real estate portfolio; tracked construction capex on green-certified developments financed through a DFI-guaranteed green bond.

Accounting and Claims Intern | National Hospital Insurance Fund (NHIF), Westlands Branch

February 2020 – April 2020 · Nairobi, Kenya

- Supported member registration, records management and counter-checking of inpatient/outpatient insurance claims.

SELECTED ENGAGEMENTS & DEAL SHEET

A flatter, faster-scan view of the flagship engagements detailed above.

Year	Engagement / Sector	Type	Role	Value / Outcome
2025–Present	Hydropower SPV: Renewable Energy	Exit Valuation & Advisory	Investment Analyst	Minority equity stake; phased IC / buyer / MC valuation versions
2023–2025	Project Cure: Pharmaceutical Manufacturing	Project Finance Modelling	Project Finance Analyst	USD 150M; DSCR 1.30x / LLCR 1.40x; advanced to next DD stage
2023–2025	Project Stationer: Manufacturing	Group Modelling & Capital Raising	Financial Modeller	USD 12M programme (USD 6M debt, 2023; USD 6M DFI equity, 2025)
2023–2025	Project Aluminium Revival: Manufacturing (Industrial)	Restructuring / Lender Oversight	Business Analyst	~USD 40M restructured debt; working-capital oversight for secured lender
2023–2025	Project Harvest: Agribusiness	Buy-Side Due Diligence	Corp. Finance Semi Senior	USD 500K impact-linked convertible note; investment closed
2023–2025	Project Portfolio: Multi-Sector Valuations	Valuation (NAV / DCF / Comparables)	Corporate Finance Senior	USD 250M+ cumulative deal value

EDUCATION

Bachelor of Commerce (BCom), Accounting Option

University of Nairobi · 2018 – 2022 · Second Class Honours, Upper Division
